

Aptar Case

APTAR Mexico - SAP ECC 6.0 Global Template Rollout

ORIGEN

Duration

May 2016 to March 2017, including 2 months post go-live support

TEAM

20 Key users + Client Management
14 Consultancy members + Project manager

Functionality

- SAP/MES Implementation (Core Module)
- E-Factura for Mexico
- E-Accounting for Mexico
- SAP Country Template configuration for Mexico

Situation:

Aptar's main objective was to rollout the standardization of its global SAP template to its Mexico operations while complying with local legal or specific business requirements with the intent to reduce implementation and maintenance costs while improving support efficiency. Mexico was a successful go-live which quickly adapted to the new SAP environment with no unplanned downtime.

Feedback from Aptar:

- Senior consultant team with 10-15 years experience
- Excellent knowledge of Mexican localization for SAP
- Bilingual consultants (English-Spanish) also required due to constant interaction with Aptar Global Team in Italy and project documentation
- Project Manager leadership and Change Management consultant role played a key factor on this implementation to succeed

Results

- Reduction of risks through comprehensive change management planning and execution
- Integration to a centralized Global Competency Center schema
- Local requirements covered for electronic invoice, electronic accounting, and other Mexico specific compliance components
- Planning with APO
- Warehouse Management with Mobisys readers.
- Integration with MES (production system).
