Why SAP?

- ❑ 99 of the 100 largest companies in the world are SAP customers.

- ❑ 85% of the largest companies in the world use S/4HANA

- ❑ Market share leader in enterprise application software, resource management and ERP, according to IDC

Why Origen Tech?

- ❑ SAP S/4 Solution as a Service, SAP TDF as a Service and SAP ACR (Advanced Compliance Reporting): Origen's innovative offerings for the cloud.

- ❑ Origen's expertise in SAP localization for Latin America in global companies.

- ❑ Origen's alignment with the global SAP program ensures that customers receive up-to-date information, access to the latest tools and resources, and benefit from the collective knowledge and experience of SAP

- ❑ Provides application, implementation, management, and support services.

- ❑ Senior Consulting Team with communication fluent in English, Spanish and Portuguese.

Why S/4HANA Migration?

- ❑ Real-time analytics competence – SAP S/4HANA has accelerated business intelligence functionalities built into itself, which will help your company react in almost real time to occurrences impacting your business and capitalize on opportunities and pull through conflicts.

- ❑ Scalability – every company aims to grow, and one of the best benefits to migrating to SAP S/4HANA is that when your needs increase and the company expands, you can easily increase the size of your solution to fit your growth.

- ❑ Ability to handle bigger data – SAP S/4HANA gives you the ability to process a far greater volume of data and make better use of such data since the solution integrates information from external and internal sources.

You Wins!

- ❑ Future-proofing: simplifies the IT landscape by consolidating various components and functionalities into a single system.

- ❑ Advanced Analytics and Insights: leverages SAP HANA's in-memory computing capabilities to provide real-time analytics and insights.

- ❑ Streamlined Processes: introduces simplified and streamlined business processes based on best practices, helping eliminate unnecessary steps, automates routine tasks, and improves overall efficiency.

- ❑ Regulatory Compliance: incorporates updated regulatory requirements and compliance standards.

- ❑ Agility and Innovation: designed to support digital transformation and enable businesses to embrace emerging technologies.
